Wolfersberggasse 26/5 | 1140 Vienna | Austria

Brief profile

I have been interested for a long time during my working life in providing business consulting and I have finally found the right way for me to do it in the form of Agile. During my studies I developed a strong interest in numbers and in the finance field in general. I have always thought that this would be the right career path for me, however after experiencing working in various finance departments, doing different roles I have realized that what I enjoy the most in this area is analytical thinking. Critical thinking is also a crucial part of Agile and I am eager to gain more experience and work on business cases together with companies using the art of Agile management.

Education

Feb 2018 - May 2018 German course level B1 (Vienna, Austria)
